Subpart E—Frequencies

§87.169 Scope.

This subpart contains class of station symbols and a frequency table which assignable frequencies. quencies in the Aviation Services will transmit communications for the safe, expeditious, and economic operation of aircraft and the protection of life and property in the air. Each class of land station may communicate in accordance with the particular sections of this part which govern these classes. Land stations in the Aviation Services in Alaska may transmit messages concerning sickness, death, weather, ice conditions or other matters relating to safety of life and property if there is no other established means of communications between the points in question and no charge is made for the communications service.

[69 FR 32882, June 14, 2004]

§ 87.171 Class of station symbols.

The two or three letter symbols for the classes of station in the aviation services are:

Symbol and class of station

AX-Aeronautical fixed

AVW—Audio visual warning systems

AXO—Aeronautical operational fixed

DGP—Differential GPS

DLT—Aircraft data link land test

FA—Aeronautical land (unspecified)

FAC—Airport control tower FAE—Aeronautical enroute

FAM-Aeronautical multicom

FAR—Aeronautical search and rescue

FAS—Aviation support

FAT—Flight test

FAU—Aeronautical advisory (unicom)

FAW—Automatic weather observation

GCO-Ground Communication Outlet

MA—Aircraft (Air carrier and Private)

MA1-Air carrier aircraft only

MA2—Private aircraft only

MOU-Aeronautical utility mobile

MRT—ELT test

RCO—Remote Communications Outlet

RL—Radionavigation land (unspecified)

RLA—Marker beacon RLB—Radiobeacon

RLD—RADAR/TEST

RLG-Glide path

RLL-Localizer

RLO-VHF omni-range

RLS—Surveillance radar

RLT-Radionavigation land test

RLW-Microwave landing system RNV-Radio Navigation Land/DME

RPC—Ramp Control

TJ-Aircraft earth station in the Aeronautical Mobile-Satellite Service UAT-Universal Access Transceiver

[53 FR 28940, Aug. 1, 1988, as amended at 57 FR 45750, Oct. 5, 1992; 64 FR 27475, May 20, 1999; 69 FR 32882, June 14, 2004; 71 FR 70676, Dec. 6, 2006; 76 FR 17351, Mar. 29, 2011; 78 FR 61206, Oct. 3, 2013]

§87.173 Frequencies.

- (a) The table in paragraph (b) of this section lists assignable carrier frequencies or frequency bands.
- (1) The single letter symbol appearing in the "Subpart" column indicates the subpart of this part which contains additional applicable regulations.
- (2) The two or three letter symbol appearing in the "Class of Station" column indicates the class of station to which the frequency is assignable.
 - (b) Frequency table:

Frequency or fre- quency band	Subpart	Class of station	Remarks
90–110 kHz	Q	RL	LORAN "C".
190-285 kHz	Q	RLB	Radiobeacons.
200-285 kHz	O	FAC	Air traffic control.
325-405 kHz	0	FAC	Air traffic control.
325-435 kHz	Q	RLB	Radiobeacons.
410.0 kHz	F	MA	International direction-finding for use outside of United States.
457.0 kHz	F	MA	Working frequency for aircraft on over-water flights.
500.0 kHz	F	MA	International calling and distress frequency for ships and aircraft on over-water flights.
510-535 kHz	Q	RLB	Radiobeacons.
2182.0 kHz	F	MA	International distress and calling.
2648.0 kHz	1	AX	Alaska station.
2850.0-3025.0 kHz	1	MA, FAE	International HF.
2851.0 kHz	I, J	MA, FAE, FAT	International HF; Flight Test.
2866.0 kHz	1	MA, FAE	Domestic HF; (Alaska).
2875.0 kHz	1	MA, FAE	Domestic HF.
2878.0 kHz	1	MA1, FAE	Domestic HF; International HF.

§87.173

Frequency or fre- quency band	Subpart	Class of station	Remarks
2911.0 kHz	I	MA, FAE	Domestic HF.
2956.0 kHz	I	MA, FAE	Domestic HF.
3004.0 kHz	I, J	MA, FAE, FAT	International HF; Flight Test.
3019.0 kHz	I	MA1, FAE	Domestic HF; International HF.
3023.0 kHz	F, M, O	MA1, FAR, FAC	Search and rescue communications.
3281.0 kHz	K	MA, FAS	Lighter-than-air craft and aeronautical stations serving
0400 0 0500 0 141-		*** 5*5	lighter-than-air craft.
3400.0–3500.0 kHz	 	MA, FAE	International HF. Domestic HF.
3434.0 kHz 3443.0 kHz	J	MA1, FAE MA, FAT	Flight Test.
3449.0 kHz	I	MA, FAE	Domestic HF.
3470.0 kHz	1	MA, FAE	Domestic HF; International HF.
4125.0 kHz	F	MA	Distress and safety with ships and coast stations.
4550.0 kHz	1	AX	Gulf of Mexico.
4645.0 kHz	1	AX	Alaska.
4650.0–4700.0 kHz	I	MA, FAE	International HF.
4672.0 kHz	I	MA1, FAE	Domestic HF.
1947.5 kHz	I	AX	Alaska.
5036.0 kHz	I	AX	Gulf of Mexico.
5122.5 kHz	I	AX	Alaska.
5167.5 kHz	I	FA	Alaska emergency.

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting §87.183, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and at www.fdsys.gov.

Subpart F—Aircraft Stations

§87.185 Scope of service.

- (a) Aircraft stations must limit their communications to the necessities of safe, efficient, and economic operation of aircraft and the protection of life and property in the air, except as otherwise specifically provided in this part. Contact with an aeronautical land station must only be attempted when the aircraft is within the serivce area of the land station, however, aircraft stations may transmit advisory information on air traffic control. unicom or aeronautical multicom frequencies for the benefit and use of other stations monitoring these frequencies in accordance with FAA recommended traffic advisory practices.
- (b) Aircraft public correspondence service must be made available to all persons without discrimination and on reasonable demand, and must communicate without discrimination with any public coast station or mobile-satellite earth station authorized to provide aircraft public correspondence service.
- (c) Aircraft public correspondence service on maritime mobile frequencies may only be carried by aircraft stations licensed to use maritime mobile frequencies and must follow the rules for public correspondence in part 80.
- (d) Aircraft public correspondence service on Aeronautical Mobile-Satellite (R) Service frequencies may only be carried on aircraft earth stations licensed to use Aeronautical Mobile-Satellite (R) frequencies and are subject to the rules for public correspondence in this part. Aircraft public correspondence service on Maritime Mobile-Satellite Service frequencies may only be carried by aircraft earth stations licensed to use Maritime Mobile-Satellite frequencies and are subject to the rules for public correspondence in part 80.

[53 FR 28940, Aug. 1, 1988, as amended at 57 FR 45750, Oct. 5, 1992]

§87.187 Frequencies.

- (a) Frequencies used for air-ground Communications are listed in subpart E. Aircraft stations may use frequencies assigned to Government or non-Government aeronautical stations or radionavigation land stations if the communications are within the aeronautical or radionavigation land station scope of service.
- (b) 410 kHz is the international direction-finding frequency for use outside the continental United States.
- (c) 457 kHz is an authorized working frequency for flights over the high seas.
- (d) 500 kHz an international calling and distress frequency for aircraft on flights over the high seas. Except for distress, urgency or safety messages an aircraft station must not transmit on 500 kHz during the silence periods for three minutes twice each hour beginning at x h. 15 and x h.45 Coordinated Universal Time (u.t.c.).
- (e) The frequency 2182 khz is an international distress and calling frequency for use by ship, aircraft and survival craft stations. Aircraft stations must use J3E emission when operating on 2182 kHz and communicating with domestic public and private coast stations. The emission H3E may be used when communicating with foreign coast and ship stations.
- (f) The frequencies 3023 kHz, 5680 kHz, 122.900 MHz and 123.100 MHz are authorized for use by aircraft engaged in seach and rescue activities in accordance with subpart M. These frequencies may be used for air-air and air-ground communications.
- (g) The frequency 4125 kHz may be used for distress and safety communications between aircraft and ship and coast maritime mobile stations.
- (h) The frequency 8364.0 kHz is authorized for use of survival craft for search and rescue communications with stations in the maritime mobile service.
- (i) The frequencies in the band 121.975-122.675 MHz are authorized for
